Product Features:

- 99,9% Microbial kill rate within 60 seconds independently tested to EN 1276 standards
- Latest counter-ion technology
- Residual skin protecting properties
- Grime penetrating technology for hands which haven't been washed first
- Highly effective against enveloped viruses with superior gram-positive and gram-negative bacteria killing capabilities
- Toxicology Risk Assessment Approved
- Excellent efficacy in the presence of high organic protein loadings
- Safe for use in the food industry
- Eco-Choice Type 1 Eco Accreditation
- Non-toxic, non-volatile, non-corrosive
- NRCS Registered

Industry Applications:

- Food
- Industrial
- Domestic
- Institutional

Recommended Use:

Form a cup with one hand, and apply a sufficient amount of product (approximately 2ml) into the hand. Dip fingernails of the other hand into the liquid for about 5 seconds. Then form a cup with the other hand, and repeat the process. Then rub the liquid into the palms of the hands, covering the back of the hands, taking care to apply product between the fingers. Allow to self-dry (minimum 60 seconds).

Shelf Life & Storage:

Store in cool, dry place. Stable for 24 months.
